The diagram illustrates a 4-core cable system. On the left, a 'Camera' is connected to a 'Junction Box' in the center. The Junction Box contains two components: 'PFA121' (top) and 'PFA130-E' (bottom). From the Junction Box, the system branches out to a 'Pole/Corner Mount' on the right. This mount contains three components: 'PFA156' (top), 'PFA152-E' (middle), and 'PFA151' (bottom). Red arrows indicate the main signal path from the Camera to PFA121, then to PFA156 and PFA152-E. Blue arrows indicate a secondary path from the Camera to PFA130-E, which then connects to PFA151 and PFA152-E. Green umbrellas are placed near PFA121 and PFA130-E.

Diagram illustrating the connection of cameras to a Junction Box and then to Pole/Corner Mounts.

Camera

Junction Box

Pole/Corner Mount

Connections shown:

- Red line from PFA135 to PFA152-E
- Red line from PFA135 to PFA157
- Blue line from PFA130-E to PFA151
- Blue line from PFA122 to PFA151
- PFA13G is not connected to any mount.

Diagram illustrating the connection of a camera to a junction box and then to two different pole/corner mounts. The junction box has two outputs: one for PFA130-E (with a green umbrella icon) and one for PFA135. The pole/corner mounts are PFA157 and PFA152-E.

Diagram illustrating the connection of a camera to a pole/corner mount. The camera is connected to the PFA154 mount via a red line, and to the PFA155A mount via a blue line.

The diagram illustrates the connection of various PFA camera models to different mounting types and junction boxes. The columns represent the components: Camera, Wall Mount/Plane Mount, Ceiling Mount, Junction Box, and Pole/Corner Mount. The rows represent the camera models: PFA162, PFB110C-E, PFB110W, PFA122, PFA121, PFA152-E, and PFA156. The connections are as follows:

- PFA162** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.
- PFB110C-E** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.
- PFB110W** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.
- PFA122** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.
- PFA121** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.
- PFA152-E** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.
- PFA156** connects to **Wall Mount/Plane Mount** and **Pole/Corner Mount**.

Camera Junction Box Pole/Corner Mount

```

    JB --> PM[PFA150-SG Pole/Corner Mount]
  
```

The diagram illustrates the connection from a Camera to a Junction Box (PFA124-B) and then to Pole/Corner Mounts (PFA152-E-B and PFA156-B). A red arrow connects the Camera to the Junction Box. A blue arrow connects the Junction Box to the Pole/Corner Mounts. A green umbrella icon is placed near the Junction Box, indicating protection from weather.

Diagram illustrating a power distribution system for a camera. A Camera is connected via a blue line to a Junction Box (PFA121). From the Junction Box, a red line goes to a Pole/Corner Mount (PFA156), and three blue lines branch out to other Pole/Corner Mounts (PFA152-E and PFA151).

Diagram illustrating the connection of a camera to various mounting options using the PFB605W bracket. The camera is connected to the PFB605W bracket, which is then connected to either a Wall Mount/Plane Mount, Ceiling Mount, Junction Box, or Pole/Corner Mount. The PFB605W bracket is highlighted with a red box.
